DETAILED ACTION

1. The previously indicated allowable subject matter has been withdrawn due to further search and/or consideration.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 31-37, 39, 40, 42-48, 50, and 51 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,515,592.

US'592 discloses an apparatus that includes a drill pipe for an oil or gas well comprising: a generally cylindrical hollow drill pipe 122 having a length; and a conductive coating 140 connected to the drill pipe to define an electrical pathway 12 that extends along at least a portion of the length of drill pipe. See especially figs. 15-17 and cols. 6, 12, and 13. With respect to depending claims 32-37, 39, and 40, the reference teaches the limitations as claimed, including insulative coating 130, a second conductive coating 40, and second path 12. With respect to claim 42, the reference discloses a method that includes a method of communicating to downhole oil or gas well equipment comprising: providing a generally cylindrical hollow drill pipe having a

length; and applying a conductive coating on the drill pipe to define an electrical pathway that extends along at least a portion of the length of the drill pipe (see reference numerals with respect to the apparatus claims above). With respect to the depending claims 43-48, 50, and 51, the reference teaches the limitations as claimed.

Allowable Subject Matter

4. Claims 38, 41, 49, and 52-55 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 31-55 have been considered but are moot in view of the new ground(s) of rejection.
